

THE GLEICHEN CALL

VOLUME XXXI NO. 21

GLEICHEN, ALBERTA, WEDNESDAY AUGUST 10, 1938

SUBSCRIPTION \$2.00 PER YEAR

TOWN COUNCIL CLEAR UP DEBT IRRIGATION LAND

The town council held a regular meeting on Tuesday evening last in the town office which began at 8 o'clock. Mayor Russell and councillors Menard, W. E. Thompson, Thompsons Menard were present.

Mr. Boyd requested that the council consider allowing rent to be applied against the payment of a house occupied by a family. It was moved by Councillor Thompson and seconded by Councillor Menard that the matter be investigated by the committee and a report brought in at the next meeting.

It was reported to the meeting that the plastic seal had been applied to the roof of the Community hall and there was one drum of the plastic seal left over. The councillors suggested that the barrel of seal be returned.

Notice of attendance of a patient from Gleichen had been received from the Holy Cross hospital. The communication was ordered filed.

A piece of property, lot 9 in block 6, had been appealed to the Alberta assessment commission and the appeal allowed. The discount date had expired, but the council felt that the owner is entitled to the discounts as the money was available at the time the discount was in force. A motion was carried granting the discount.

A letter had been received from the C.P.R. in connection with the assessment since the town of the north half 22-22-22 and asking for a refund of \$12.16 being for the excess paid on account of an error in the assessment. The matter was ordered to be looked into and a report brought in at the next meeting of the council.

Applications for three old age pensions had been made and approval had been given. The council also had been forwarded by the department at Edmonton for the approval of the council, the councillor ordered that the applications for the pensions be approved.

There was an amount of \$87 still outstanding on the purchase price of the small tract of land purchased from the town from the Department of Agriculture for irrigation purposes. The department had requested that this be settled by applying the taxes owing to the town against the unpaid balance, together with the usual discounts. After some discussion it was moved and carried by Councillors Menard and Thompson that the amount owing the department for taxes on this property less five per cent discount be deducted and a cheque forwarded to the department for the balance.

Engineer Lester was granted a week's holiday commencing on August 14th. The public works committee will find a man to look after his job while he is away.

The following accounts were presented for inspection and approved for payment:

THE WORLD OF WHEAT

By H. G. L. Strange, Director of
"Crop Testing Plant"

Popular discussions and amazing results. Such are the extraordinary beliefs that the student of history finds have been held by large numbers of people at various times throughout the ages.

In Canada, for instance, only a

Golf Week in the Canadian Rockies

The Banff Springs Hotel's annual golf week is set for August 22-27, and the contest for the long list of cups and prizes will be waged in a mountain setting so beautiful as to make the old adage, keep your eye on the ball, doubly difficult of fulfillment.

Golf week at the Banff Springs course will see many notable U.S. and Canadian amateurs with a sprinkling of British and European entrants, fighting it out for the Edward Prince of Wales trophy.

Short time ago, it was seriously contended that the climate over the prairies had changed, that the drought was permanent, and that never again could we expect normal rainfall. Another statement was: "That even though it rained the land would not produce good crops as it has done in the past, because farmers stupidly had robbed the soil of fertility and fibre."

Yet last autumn, once again normal rainfall occurred, and over large areas of the west, particularly in the drought areas, abundant rains have slain so far during this growing season.

In addition, the soil in the drought areas, that many said had lost its fertility and fibre, is again growing a splendid wheat crop.

The truth is, that over a term of years climate does not seem to change, and that, given normal rainfall average yields will certainly be produced. Also it seems that predictions about rainfall and yields are misleading, futile and vain.

Following factors have tended to raise price: Hail and grasshoppers cause further damage in Western Canada. Greece buys Canadian wheat. France to store wheat for military supplies Japan and Russia clash on border of Manchukuo. Unsettled political conditions in the Far East.

Unfavorable advices from Russian spring wheat territory.

GIVE INTERESTING DISPLAY OF ELECTRIC KITCHEN

Last week for two days an interesting demonstration of the electrically equipped kitchen was given under the auspices of the Calgary power company. The demonstration was given in a tent which adjoined the big trailer beside the general store. The equipment was entirely electrical and the convenience of the arrangements in the kitchen was wonderful. Ranges, electric coffee makers, a full sized range, a stainless steel sink, electric washer, toaster, iron, and so on, were the envy of the visitors who attended the lectures on both days. The young ladies in charge of the demonstration explained everything in a very pleasing manner. The local electrical expert, Herb Hunter assisted by a man with the skill were in charge of equipment.

Miss Betty Taylor, who is on the staff of the General Hospital, Calgary, arrived home last week to spend the next three weeks visiting her parents, Mr. and Mrs. E. W. Taylor.

phy, put up by former King Edward VIII and the Williamson cup for men. Associated Screen News cup and the Brewster trophy and a host of other coveted awards for women.

As much as a social as a sporting event, Banff's golf week is the signal for a round of informal entertainment centred at the baronial Banff Springs hotel, beneath the terrace of which the great golf course winds down over the Bow River for 5,642 yards of unrivalled fairways and greens.

As much as a social as a sporting event, Banff's golf week is the signal for a round of informal entertainment centred at the baronial Banff Springs hotel, beneath the terrace of which the great golf course winds down over the Bow River for 5,642 yards of unrivalled fairways and greens.

SOCIAL CREDIT GROUP HEAR REPORT MCCUNE'S MEETING

(Communicated)
Due to the very serious illness of Mrs. John Wilson, the semi-monthly meeting of the Meadowbrook Social Credit Group was held at Mrs. Annie Plante's home Tuesday morning.

Mr. Baker spoke very eloquently and urged co-operation and a large membership.

The very important current events and news items of interest taken from the newspapers and over the radio and which is of great interest to us, were read and discussed.

The secretary was instructed to write a letter to Mrs. John Wilson telling how sorry we are that she has been ill and unable to be with us.

For sometime the meeting has devoted a good part of its time to the study entitled "Social Dynamics". This was continued and the second lecture finished, the same being read by Mrs. Nelson.

For entertainment, Miss Gladys Wilson, sponsored a guessing contest, and the lucky winner, Mrs. Geo. Bell, received a rose glass cup and saucer.

Mr. Nelson gave a report on the public meeting addressed by Mr. McCune, our representative, and Mr. Floyd M. Baker, for the benefit of those who were unable to attend.

GRAIN MEN WISH GOVERNMENT ABLE FIX HIGHER PRICE

In an interview relating to the guaranteed minimum price of 80 cents per bush announced by the Dominion government, C. E. Hayles, president of the North-West Grain Dealers Association, said:

"The members of the North-West Grain Dealers Association are pleased to note that the Dominion government has recognized the principle that, in the face of adverse international and national conditions the economic position of the western farmer is entitled to federal support."

"We wish, however, that the Dominion government had been able to guarantee a higher price."

balloon Saturday night brings the week to a close with presentation of cups and prizes.

The spectacular Banff Springs course has its fairways laid along the valley of the Bow River into which the rushing spray dumps its green waters beneath the towering first tee. Tumbled for beauty, the course also ranks among the world's best for its length, trickiness and general sameness of design. Pictures above show the Edward Prince of Wales Cup and views of the course.

ITEMS OF INTEREST OF THE TOWN AND DISTRICT

Campbell and Tom Brown, are sojourning in California, having left a week ago for the southern state.

Scotty Gove, who is now living in Turner Valley, spent a few days in town last week renewing acquaintances.

Wm. Taylor, a former Gunner hockey star, but now with the staff of Trail Smelter Company at Trail, B. C. is spending a week in town holidaying with relatives and friends.

The local Old Timers' Association were to have held their annual picnic at the farm home of Mr. and Mrs. Duncan McLean Sunday, but the rain the night before and during the day made it necessary to postpone the event.

Wm. Halstead, wife and family returned Sunday from a three weeks trip to the coast. While away they visited Vancouver, Seattle, Spokane, the Grand Coulee Dam. Mr. Halstead states the dam is the biggest piece of work he ever saw and added he spent about four hours in appreciating the joy and then did not see all of it.

SCOUT NEWS

Something new in Canadian Boy Scout camping is being introduced this summer at Camp Woods, Alberta's provincial camp site on Sylvan Lake. This is the open front log camp shelter for many years used in winter as well as summer in the Adirondack mountains of New York state, and known as the "Adirondack shelter". Six such log huts each nine by twenty feet, were built by a party of Alberta Scouts and Rover Scouts, aided by two experienced Finnish log house builders.

When his foreman at the Woolwich arsenal made an insulting reference to scouting and Lord Baden-Powell, Rover Scout Tom Bromley challenged him to a fight to a finish at the Green Gate Boxing Ring. The challenge was accepted, and the fight held. The Rover proved the better fighter, flooring his opponent three times, but the foreman was the better boxer, and the fight was declared a draw. At the conclusion, the foreman apologized for his remarks, and later applied to become a member of the Rover Crew.

An agreement not to sell cigarettes or tobacco to boys and girls under 16 was secured from thirteen local

REDCLIFF SOFTBALL GIRLS CAPTURE DOUBLE HEADER

A girls softball team from Redcliff paid Gleichen a visit last week and played the local girls a double header, one game in the afternoon and the other in the evening. Redcliff won both games. The first game resulted in a score of 6-0 while the score for the second was 12-3. The first game was particularly interesting in that the visitors played errorless ball. The attendance at the games was a keen disappointment as the collection was not enough to defray expenses. The local team is expected to play a return game in Redcliff at an early date.

business firms of Langley, B. C. through a petition circulated by the Boy Scouts. Parents were asked to co-operate by refraining from sending minors to the stores for tobacco. As there is far too much smoking among the boys of Gleichen and the idea above would be well worth trying out here.

FORESTRY CAR WILL BE HERE NEXT TUESDAY

The Canadian Forestry Association's tree planting car will be in Gleichen on Tuesday August 16th, with program in the evening at 8 o'clock.

The moving picture part of the program covers a variety of subjects, and are in sound, or "talkies", and those who attend will find these educational also entertaining.

There is no admission fee or charge of any kind.

You are invited to go and to talk over your own shelter belt problems. The tree planting car is sent to this community by the Canadian Forestry Association through the courtesy of the railway companies and a group of subscribers who defray all the expenses. The object of the tour is to encourage the planting of trees as windbreaks to prevent soil drifting, to moderate the wind damage to grain crops, to help conserve moisture and to beautify farm surroundings.

THE FIGHT GOES ON

Western farmers must persist in their fight for a greater degree of price security in the marketing of their main product—wheat.

To continue the fight for just and equitable treatment a strong concentration of effort is required.

The natural focal point for such an effort is the Wheat Pool movement.

Alberta Wheat Pool

SCHOOL NOTICE

Parents who are non-residents, and who desire to have their children attend the Public or High School in Gleichen will be required to procure authorization from the secretary-treasurer by which the Principal may admit them for attendance. Unless this is presented the Principal has been instructed not to enroll any non-resident pupils.

For terms etc. apply previous to September 1st to

W. J. PHYTHIAN,
Secretary-Treasurer.

PLUG SMOKING TOBACCO

An Educational Need

"The strength of a nation depends on an incalculable extent upon its educational facilities."

A whole volume—many, many volumes—of wisdom and truth are couched within the foregoing sentence, an extract from a brief submitted to the Rowell Commission on Dominion-provincial relations by two professors of the University of Toronto on behalf of the student body of the nation.

The purpose of the brief was to present to the Commission the claims of students for the establishment of State scholarships to permit entry to the universities of the country of many who could never afford the opportunity which these institutions yield for broadening the mind and for training for leadership but who, otherwise, are well qualified.

The request for the establishment of such scholarships is based, not so much on the need for training minds which might subsequently be expected to be capable of contributing to technological development, but rather to ensure training of experts in the field of the social sciences, a sphere of activity in which, it is pointed out, comparatively little research work has been undertaken in Canada and for which no provision has yet been made in the programme of the National Research Council.

Information supplied the Commission shows that in the respect Canada lags far behind the other Dominions as well as other leading countries outside the Commonwealth, in that in this country there is no provision for State matriculation scholarships and that the number of awards from private sources is relatively small.

West In The Cold

Moreover, data and statistics contained in the brief demonstrate conclusively that in the matter of scholarships available from private sources the western provinces are discriminated against in an extraordinary and quite understandable degree. For, to quote the brief, "of 324 matriculation scholarships available annually in this Dominion having an aggregate value of \$108,140, the Province of Ontario receives 268 with an aggregate value of \$78,000, leaving less than half the amount to be distributed in 236 awards in the remaining eight provinces."

As a result some of the brightest minds are directed to the eastern institutions of learning and, again to quote the brief, "this is the worst deprivation of the very men who might be expected to contribute most to a solution of pressing economic, social and political problems."

Because of the situation and because of the inability of the provinces, and particularly the western provinces, to finance scholarships to anything like an adequate degree, it is suggested that Federal aid be sought to enable the provinces to finance State scholarships and thus provide at least the means to ensure the education of those who show greatest promise in the field where the west urgently needs assistance—the cultivation of minds capable and fully equipped to solve problems of great magnitude.

Not The Entrance Key

It might be urged in opposition to such a plan that already too many students are being turned out of western universities for whom apparently there is no place in the commercial and economic life of the country under present conditions, but this can at least be partially attributed to the fact that brilliance and ability do not furnish the open sesame to the university classrooms.

In too many instances desks in the university classrooms are occupied by students who are sufficiently apt to scrape through entrance and subsequent tests with a minimum of effort and whose parents furnish the wherewithal simply because it is the thing to do, because a university degree is regarded as a hall mark of class distinction, or because it is believed that social or business contacts made there will be of some assistance in later years.

On the other hand many who are mentally equipped to a far greater degree and who could derive a great deal more benefit from a university education are unable to do so because of family poverty or because of their own inability to finance their way through college. Thus there is a real loss not only to the individual and the family but to the community and perhaps the nation. Scholarships, such as those proposed to the Rowell Commission would, to some extent at least, remedy this condition.

Of Further Importance

There is a further thought worthy of consideration when the establishment of state scholarships is under advisement. When it is remembered that the universities are expected to turn out men and women who will, and should be, leaders of opinion in their respective communities and provinces, the necessity of affording every opportunity to youth of brilliant mind, capable of clear and logical thinking, to pursue their studies to a conclusion, is highly important in a country which is only now shaping her future destiny, and in a day of expansion when domestic institutions and form of government are threatened by new and untold political and social dangers.

With a large number of people too inert to do their own thinking and willing to be stampeded in any direction by the belief of glib orators, it is highly important that encouragement and opportunity be given to talent wherever it may be found and to give the best brains full opportunity for development in order that leadership in the future may be founded upon experience, logic and sound commonsense, if the country is to make progress and the future is to be assured.

Cost Of A Dukedom

It cost \$250,157.10 to give the Duke of Windsor his dukedom. Supplementary civil estimates included an item for stamp duties on "royal warrant, letters patent and the docket creating the Dukedom of Windsor."

People are reading fewer but better books than they used to, says a librarian. If they read only the better books they are certainly reading fewer.

Skinkworms outgrow their skins four times during their rapid growing period.

No Longer Plentiful

Union leader at Seattle says white collar workers must organize. But, where, oh where, have the white collar workers gone? We've just glared around a roomful of chaps generally supposed to be in that class and could count only two white collars in the lot. The rest were blue, green, gray, polka-dotted and doubtful.

"What's next on the screen?" asks a movie gossip writer. Flies, we guess.

Snakes shed their eyelids when they shed their skins.

Canyon Under The Pacific

Is Believed To Contain All Varieties Of Minerals Known

The discovery of phosphorus 1,000 feet under water on a Pacific ocean canyon opens a new world for fortune hunters. The finding was described at the Scripps Institute of Oceanography by Dr. F. P. Shepard, geologist of the University of Illinois.

The fertilizer rock was dredged from the upper walls of the submarine canyon 50 miles off the shore of California. The phosphate nature of the rock, he said, was determined by K. O. Emery, who is making a study of the rocks collected from the canyon.

This canyon is one of scores discovered in ocean bottoms by geologists in the last two years. The canyon are in all oceans. They are an exception, however, in that the bottoms are not muddy. Their walls are rocky and the rocks are of all kinds, like those on land.

There is reason to believe that the "canyon" walls contain all the varieties of minerals known. Some of the canyons are as large as the Grand Canyon of the Colorado River. The phosphate rock canyon V-shaped. Its bottom lies half a mile under water. Its sides are from 1,200 to 2,000 feet high. Dr. Shepard dredged the samples from a stretch 20 miles long, indicating that the deposit is probably extensive and of great value.

The phosphate was identified as of the Miocene Age. That age ended about 17,000,000 years ago. It is possible, Dr. Shepard said, that phosphate may be forming now in the submarine canyon. From this fact it is possible that the phosphate area where it was found he brought up fossil bones of an unidentified animal.

The geological prospectors seek to learn the origin of these great canyons in ocean bottoms. They are among the most mysterious of no provision for State matriculation scholarships and that the number of awards from private sources is relatively small.

To Guard Switzerland

Little Canton Has Devised Unusual Means For Its Defence

Hundreds of little, round metal manhole covers dot the highways and byroads of Switzerland near the Confederation's frontiers with Germany. They're a key part of Switzerland's national defense system. Beside the highways lie piles of steel rails. Most travelers who see them think they've been left by the roadside to rust by careless railroad workers. Investigation, however, may show one end of the rails has been ground into a sharp point. When a Swiss soldier holds a rifle and manoeuvres on the frontier, however, the secret is out. In the "battle" plans the rails begin to move. They are used to form a practical enemy crowd the frontier.

Sharp stiers scream out in the forests, in the low hills and villages. The troops tumble out of barracks and rush to their defence positions while the Swiss and Swiss farmers run to the highways.

Some villagers, using the simple lid lifts all Swiss kitchens have by stove, raise the little iron manhole covers. Others carry the rails out to the highways.

The little round holes reveal a deep slot with a reinforced concrete base. In go the rails with the sharp points pointed toward the frontier at a 45-degree angle. Within less than two minutes after the villagers arrive the road literally bristles with steel rails. The rails are used in the way of tanks or motorized units that would be coming from the frontier.

"The little round holes reveal a deep slot with a reinforced concrete base. In go the rails with the sharp points pointed toward the frontier at a 45-degree angle. Within less than two minutes after the villagers arrive the road literally bristles with steel rails. Making Use Of Drugs

Japanese Trying To Undermine Health Of Chinese In North

War has always brought misery and death, but there can be nothing in history so foul as the manner in which the Japanese are now trying to undermine, by the use of drugs, the health and morals of the inhabitants of the occupied area in the north. China and the world will always remember the stern and effective steps taken by Generalissimo Chiang Kai-Shek to stamp out the drug traffic and will regard the Japanese as men with loathing for the policy they are now following of encouraging the use of drugs among the Chinese and foreigners who use narcotics within their sphere of influence.

Appliances may replace mule-trains as a means of exporting choice from dense jungle of northern Guatemala.

Religious Broadcasts

Sunday Afternoon Sermons May Be Started In October

Although the newly-created national advisory council on the broadcasting of religious services includes representatives of the five large Canadian churches, smaller religious organizations will not be neglected in religious broadcasts. Major advertisement Murray, general manager of the Canadian Broadcasting Corporation, indicated.

Smaller denominations, including the Salvation Army, Disciples of Christ, Christian Science and Latter Day Saints will be given opportunities to share in the broadcast.

The national council is composed of the following: Rev. Carl V. Farmer, Baptist; Rev. Briarty Brown and Rev. J. B. Ward, Church of England; Rev. J. B. Thompson and Rev. Joseph Wason, Presbyterians; Mons. Edward M. Brennan and Rev. Charles Langhorne, Roman Catholic; Rev. J. R. Matichon and William Orr, United Church. All are from Toronto. Mr. Ward is chairman and Mr. Matichon secretary of the council.

It is proposed to provide two national half-hour religious broadcasts, church, afternoon and regular half-hour regional broadcasts of religious services Sunday mornings.

The morning broadcasts will be started in January, 1935, at least but the afternoon broadcasts will likely begin in October. The afternoon broadcasts will be at 12:30 p.m. (M.S.T.) and the half-hour from 3:30 p.m. (M.S.T.) for the new broadcasts. The first half-hour has been allotted by the advisory council to the Roman Catholics and the second to the Protestant churches starting in October, 2 Baptists; Oct. 9, Church of England; October 16, Presbyterians; Oct. 23, United Church.

Good News For Neighbors

Amateur Pilot Forbidden To Fly His Home-Made Plane

Herman Schapanaky, Weatherford, Okla., the butcher and egg farmer who plans to home-build a biplane, has been pronounced landings—on the nose—has been ground.

He was ordered to stay out of the air because he has no pilot's license. Neighbor farmers, accustomed to scurrying to storm cellars when they heard the sputter of Schapanaky's motor, breathed a sigh of relief.

"Schapanaky—who soloed and crashed in a junked plane in a junked biplane with a 'motor' after only three flying lessons—said: 'I'm a good flyer. They don't give an amateur young man a break in aviation any more. How far do you think the Wright brothers and Lindbergh would have gone if they'd got caught in this red tape?'"

It was said most of the time Schapanaky flies directly down a highway, so when he crashes he will be in a convenient place where his wife can pick him up.

On the first flight, fortified only by the lessons he exchanged for chicken in the forest, a Schapanaky said he crashed. Neighbors pulled him from the cockpit bleeding.

Undaunted, Schapanaky built more planes. Few of them flew long and crackups became so regular his wife said she stood by a telephone. The family car was parked nearby, ready to get him and the plane when it plumed down in someone's pasture.

No person ever went up with Herman.

Believe In Miracles

Couple In Ontario Escape Death In Grade Crossing Accident

At last night's two people in Ontario must believe that miracles still happen, as well as accidents.

Their car stalled on a grade crossing.

A train came along at 80 miles an hour and cut off the front of the car as cleanly as if a giant knife had done it.

They were left seated in the other three-quarters, without a scratch, although suffering from shock.

There's a man and his wife who are trying to write home about the health and morals of the inhabitants of the occupied area in the north. China and the world will always remember the stern and effective steps taken by Generalissimo Chiang Kai-Shek to stamp out the drug traffic and will regard the Japanese as men with loathing for the policy they are now following of encouraging the use of drugs among the Chinese and foreigners who use narcotics within their sphere of influence.

Sir Henry Morgan, the famous pirate, was knighted by the King of England and made lieutenant-governor of Jamaica because of his fearlessness in expelling against the Spaniards.

Peter Trol, foreman of the fish hatchery in Yosemite National park, eastern California, trains wildcats for a hobby.

In Java, thunderstorms occur on an average of 223 days a year.

Only FIRESTONE TIRES ARE GUM-DIPPED FOR EXTRA STRENGTH

EVERY FIRE INSULATED WITH RUBBER

GUM-DIPPING is a patented Firestone process not used by any other tire. With it every hundred pounds of cord fabric absorbs eight pounds of rubber and, as a result, every fire, every cord and every ply in a Firestone tire is coated and insulated with pure rubber to counter-act heat and friction—the greatest enemy of tire life.

Due to this extra process, Firestone Gum-Dipped Cords have 88% longer tread life. Yet you don't pay one cent more for this extra value. And you also get 2 Extra Cord Plies under the tread and the Firestone Specially Designed Safety Tread.

See the nearest Firestone dealer today!

"JUST ACROSS THE STREET..."

Yes, I saw this Gyproc in their new building... as they learn about Gyproc as they learn about Gyproc's many advantages; that it won't crack or sag or warp; that it's made from fire-proof mineral gypsum; that it is permanent. Gyproc is as easy to cut and nail as lumber. Saves time and expense in construction, with no dust or bother.

Yes, I asked him about that— the joints are invisible—the finished walls and ceilings are absolutely smooth—perfect for any type of decorating.

A free booklet tells all about Gyproc for new buildings. Write us to-day.

PRINCE'S GOLD

COURTNEY RYLEE COOPER

COPYRIGHT-COURTNEY RYLEE COOPER • W.M.U. SERVICE

CHAPTER I

Jack Hammond reflected, as he walked up from the wharf, that rain was Prince Rupert's most beautiful crop.

He made the climb from the water front and cut across the little tree-lined park, where totem poles stood gleaming with moisture and grotesquely lonely. Everything dripped in Prince Rupert this morning, even the discolored, stuffed Kaddab bear in front of Al Monson's trading store. At last Hammond halted abruptly, looking over the wooden fence of a back yard. Howls and whines had centred his attention.

"What are you trying to do with that dog?" he asked. A man halted in his effort to kick a harnessed mongrel into progress along a muddy space before a makeshift shack, weighted with stones.

"Going to make a sled dog out of him."

"That bozo? He hasn't got the weight for it."

"Oh, he's pretty strong." The man grinned. "Say, they'll be buying anything where this dog's going?"

"Where's that?"

The pseudo-trainer jerked his head toward the white pinacles of distant mountains.

"Over the hills there in B.C., the man said. 'Up the Caribou river, somewhere around the valley of the Stikine. Haven't you heard about it?'"

Hammond's features had become strangely grim.

"What's going on?"

"Where've you heard that you haven't read the papers?"

"On the Alutian, coming up from Vancouver."

"The ship that got in this morning?" he asked. "And you didn't know about it?" Then you must have been deaf, dumb and blind. There were plenty of others who came on that boat—just before the ship.

"Because of what?" Jack Hammond's hands, where they gripped the fence, were strangely discolored.

"Well, if you ain't kidding—the gold rush. Two fellows found placer gold up there. A couple of guys named McKenzie Joe Britten and his partner, Jack Hammond."

"Oh, I see," said Hammond jerkily.

"Well, I figured you might play the fool if you ever got to Seattle and met that girl, but I never thought you'd spill the beans like you did. Why didn't you wait until you got the business in shape? You got drunk? There'll be a thousand ways up in the Stikine country before break-up. I'm hitting out of here with short supplies to get better and protect our interests before the rush starts. See our lawyer and be sure our claims and leases are in good shape. Then come on with supplies as quick as you can."

Hammond turned to the waiting boy beside him and ordered his bags taken to his room. Then he headed for the door; again on the street, he started toward a three-story building a few blocks away.

His course was a broken one. To people he knew halted him to question the accuracy of newspaper stories which Jack Hammond had not seen. His evasiveness only nettled them.

"What if you haven't seen the newspapers?" they asked. "You made the discovery. The Vancouver papers have been full of it. You know all about it—what's the use of trying to keep it a secret?"

A big man, with a faint beard and a pair of keen, blue eyes, had skin, skinned, hewed-out face close to that of Hammond.

"My name's Olson," he announced. "I've got a map here—suppose you point out the place to us."

Hammond pulled at his breath. "Maybe I'd better," he agreed. "This, as Olson pointed the map before him, 'Didn't I see you on the boat from Vancouver?'"

"Yah, you saw me," said Olson. "And a lot of others."

"Why didn't you come to me then? I could have explained all this to you—maybe you wouldn't have been so anxious about getting off here?"

"You got off didn't you?" asked the man with the pack on his back.

"That was enough for me," came another voice. Then a short man, red-faced, and with an exorbitant manner, edged forward.

"How about me? I saw the story in a Whipple paper and took a plane for Jasper Park. Then caught the train up here."

"Yeh, and I came from Prince George," cut in another member of the crowd. "I thought we'd go down from Alaska—around Wrangell."

"Yeh," the volunteer trainer rubbed casually at the loose fur of his dog. "Guess they'd figured to get it quiet, all for themselves, you know. But this Hammond got down to Seattle to see some old girl he'd been stuck on ever since he was a kid. Then he got on a big bus and spilled everything. It's been in all the papers. I guess. Quite a romance."

"Yeh, quite," said Hammond thoughtfully. "So everybody's figuring on going up there, eh?"

"Everybody and his brother. That's why I thought I'd train this dog. 'That dog can't make the grade in the Stikine country. Zero's a hot day around there this time of year. No chert. Thin legs. A light coat from being around this coast country. No hair on his feet—he's lost about two inches of fur already.'"

"That ain't my worry. Let the fellow who buys him lose sleep over that." He gave the dog a kick, and the dog howled.

"The dog's howls remained in Jack Hammond's ears as he walked slowly up the street. So this was a gold rush—this an echo of the broken laughter and excited jabberings of himself and McKenzie Joe Britten, one day last autumn, up there in the faraway Stikine country. Then their discovery of placer or nugget gold, poor man's gold, as it is so often called, had brought great news. Here was new money, waiting to be washed from the gravel of a river, and of value the mines had found; no need for machinery to extract this wealth.

"There had been big talk that day about that new gold mound to be found in the world, the happiness it would bring, the accomplishments. There had been no thought of the greed, the suffering, the jealousies and hatred which must inevitably follow.

He passed Al Monson's trading store, the wharf of a blizzard or the white faces of persons who knew nothing of wind or pelting ice particles, the whip of a blizzard or the bias of sun on ice. Hammond tried to tell himself that it was none of his business. He was the best.

"Joe here," he asked the clerk. "McKenzie Joe? No, he pulled out yesterday morning, all in a rush."

"Don't say. Must have got out on a work train. Left a note for you though, Mr. Hammond."

Jack unfolded the scribbled letter that had been left by his bearded partner. It was brusque and jerky.

"Down North."

"Didn't say. Must have got out on a work train. Left a note for you though, Mr. Hammond."

Jack unfolded the scribbled letter that had been left by his bearded partner. It was brusque and jerky.

"Down North."

"Didn't say. Must have got out on a work train. Left a note for you though, Mr. Hammond."

Jack unfolded the scribbled letter that had been left by his bearded partner. It was brusque and jerky.

"Down North."

"Didn't say. Must have got out on a work train. Left a note for you though, Mr. Hammond."

For Your Preserving

Use It This Year

Wrangle by boat and up the Stikine river?

"You can't go up the Stikine this time of year," an outsider argued. "It's too wet to walk on ice."

"Will you let me explain the said up?" Hammond insisted. "If you go in by way of the Stikine, you've got to make nearly 200 miles and women back. You can't turn off that river runs through canyons at most to Telegraph creek—way past the discovery. It's not to improve; to cover the Stikine route on the ice."

"Boats make that river in the summer time," someone whispered. "Certainly; paddle wheelers. But this isn't summer. The spring break-up that country isn't due for months. Think that over?"

Then Jack Hammond stood silent, listening to the jangle of words from him. Men were arguing about whether or not the newspaper was correct, as if any inaccuracy were a personal affront. All in an instant, the thought of gold had torn reason to shreds. Then Olson caught him by the arm and said the question:

(To Be Continued)

Gossip Law in Papua

Idea To Arrest Offenders Did Not Get Very Far

Appropos of Quebec's padlock law it is interesting to learn that similar ideas have gained acceptance among the natives of Papua in the South Pacific ocean, says the Toronto Star.

The natives have their own councilors who act under the tutelage of British resident magistrates. A law was adopted which made it an offence for anyone to spread slanderous reports about their fellows. The councilors thought that perhaps they could improve upon that law, which only operated after harm had been done. Their bright idea was to pass a law providing that "if two or more women found gossiping together, they shall be immediately arrested and put in jail for two months."

In this way "bad talk" will be prevented rather than punished.

Whether it was the radio or some violent illness carried across the ocean by the wind that infected the natives with such Fascist ideas is a matter of speculation. The incident shows how careful civilized beings should be in these days of their contact. It is a worthy example for leaders of thought to ponder.

The British magistrates expressed their power of veto and Papua housewives still are at liberty to meet and exchange gossip.

New Railway Routing

Transport Act Enabling Railways To Make Agreed Changes

Provisions of the Transport Act enabling railways to make agreed changes with customers will come into effect probably early in September. The act was passed at last week's session of the House of Commons.

The railway companies were particularly anxious when the bill was before parliament, that the agreed changes of the bill should be put into effect. It would put them on a more even footing with truck competition.

Under provisions of the Transport Act, the railways will be able to make contracts with individual shippers to transport their goods at rates lower than the regular published tariffs on condition a shipper gives the railway company all its business.

The railways will be able to make contracts with individual shippers to transport their goods at rates lower than the regular published tariffs on condition a shipper gives the railway company all its business.

Using Status Of Stalin

The Georgian features of Joseph V. Stalin will dominate the Soviet building at the 1939 World's Fair in New York, instead of red symbolism.

Two prominent sculptors, Bogdanoff and Ingal, have been ordered to design a statue of the Communist dictator, seated to the size of the Eiffel tower, for which architects are drawing designs.

Cricket fighting is a popular sport in China. The crickets battle in a bamboo arena.

Imperial Policy

Development Of The Dominions To Status Of First-Class Powers

One of the main objectives of Imperial policy ought to be "the development of the gradual development of the Dominions until they attain the status of first-class powers, having decisive influence in the affairs of mankind." Colonial Secretary Malcolm MacDonald declared at Manchester.

Speaking at a luncheon of the Manchester Chamber of Commerce, Mr. MacDonald said that "the industrial development of the Dominions is wisely guided, Great Britain is not going to be the loser."

"What wants developing in the Dominions is simpler forms of manufacture. As people went into the Commonwealth countries and engaged in production, they would make the Dominions a far larger market for Great Britain in the manufacture of more complex products."

He would like to see British and Dominion industrialists get together to work out a plan for common industrial production wherever, in the long run, he believed not only the Dominions but also the Mother Country would profit.

A "great constitutional experiment," is now being carried on in India, in accord with the highest traditions of British Imperial statesmanship.

He disagreed with the view that the "experiment" had been a fatal step, beginning the complete separation of India and Great Britain. It seemed to him that the greatest present danger of mankind was the creation of racial rivalry between East and West.

"It would be the final calamity for civilization, if one day war were to break out between East and West."

What is wanted is sympathy and understanding between those peoples and the building of bridges which will prevent that division from taking place. The most important bridge of all is provided by Anglo-Indian friendship in the practical work of the Government.

Hills Of Water

Exist In Pacific Ocean Mostly Around Hawaiian Islands

Hills of water exist in the Pacific Ocean according to Howard W. Blakelee, the Associated Press science editor, quoting Dr. H. B. Fleming of the Scripps Institution of Oceanography of the University of California.

The greatest hill centres around the Hawaiian Islands. The water there is a little more than three feet higher than at the Alutian Islands, 2,000 miles south.

This vast hummock is called a gyral. It turns slowly around like an enormous top. The northwestern end of the gyral, which flows west Japan, crosses from the Orient to Alaska, and then curves to flow southward along the west coast of the United States.

The top of this hill, the surface waters around the Hawaiian Islands, is warmer than around the edges of the hill, warmer even than that near the equator.

Warm water accounts for the hill. It is not as dense as cold water. It weighs less. Yet deep in the ocean, under the warm water, the pressure of any level, due to the weight of water above is uniform. There is only one way to account for this. The warm surface water stands higher than the level of adjacent cold surface water.

The surface water tends to run down the sides of the hill. But it does not run straight down because it is also affected by the earth's rotation, by winds and consequently runs around the hill.

Off the California coast the surface rises seven inches in about 100 miles. This accounts in part for the inshore drift south of Point Conception. Some evidence of this drift has been noted in the form of bottles dumped aboard last summer by the California Fish and Game Commission to test currents. About 100 per cent. of them ran on board at points along the southern coast of the State.

Newest Police Service

Cleveland Has Curb Station To Book Traffic Offenders

Violators of Cleveland's traffic regulations now receive a "curb service" at busy intersections. The city has opened what the officials said was the first polling police station in the nation. A four-man police force on wheels not only arrests drivers, but charged them with violations on the spot of their offense.

They are released to their own homes for appearance in police court. John R. Sammon, deputy traffic commissioner, who devised the portable enforcement method, said that "getting the cases while they're hot" speeds up police work.

Oh Boy!

Hom lets me sweeten my cereal with BEE HIVE Syrup.

TRY IT TOMORROW

It Happens Sometimes

Automatic Elevator In New York

Block Went On Rampage

If you get the creeps in one of those automatic elevators where you push the buttons yourself, it may not be entirely unpleasant.

Mildred Watson, 19, a Negro maid, stepped into one in the apartment house in New York, where she works and pushed the button to go down.

The elevator took to the first floor, stopped with a bump, and abruptly started up again.

Then it went down again. Then it went up again. Then it went up again.

That went on for quite a while until the building superintendent suspected there was something irregular about the elevator making so many non-stop round trips.

He called the police and a squad of officers went into the basement and finally stopped the berserk conveyance.

Mildred stepped out, in good health, but slightly bewildered.

Builds Fortune

Manager Of Aircraft Company Accomplishes Much In Five Years

Frederick Handley Page, 52-year-old and stoutish general manager of the aircraft company he founded, has made himself a new fortune in five years and done big things for shareholders in the firm. Now he is leaving for Canada as a member of the committee which will arrange for the manufacture of heavy bombers in the Dominion.

Handley Page, Ltd., announced a final dividend of 20 per cent. tax-free for 1937, plus a capital bonus of 50 per cent. These followed an interim dividend of 10 per cent. last year and last December a capital bonus 100 per cent.

Handley Page's new fortune was his realization of the possibilities of the slotted wing device that keeps aeroplanes from spinning when they are stalled.

Nazi Cultural Program

Adolf Hitler Has No Likings For So-Called Modern Art

Adolf Hitler, who once forewarned painting for politics, opposed Germany's 1938 art exhibition with a declaration that democracies were welcome to modern artists he classed as "degenerate."

He said Nazi Germany wanted no part of them. The Fuehrer attacked cubism, futurism and other modern art, and said Nazi cultural propaganda doubtless would be recognized in the end as "the best of all possible worlds," thereby assailing even "the front of international Jewish culture mongers."

Quill Cutter Kept Busy

Demand for quill pens is so great in London that one quill cutter is making nearly 1,000 a day. A large London bank will provide its employees with quill pens. Goats quills are used as a rule, but pens for fine decorative work are made from crow quills. The cutter has been in the business for 50 years.

Cholera starting from India in 1892 killed over 378,000 persons outside of India.

Stop Scratching

It Relieves Itching of Insect Bites

From the stop scratching relief of insect bites, skin itching, and other skin troubles, this is a new, scientific, and effective method, and that getting the cases while they're hot" speeds up police work.

18 to 23 inclusive	20	2550AJ
B		5843N

I WISH I'D KNOWN

There's always a new experience ahead something you haven't done before and which calls for a decision.

You become engaged—and immediately you are called upon to decide on the purchase of many, many things you never bought before.

You marry—and furniture, draperies, silverware, china, radios, gas stoves, automobiles, gasoline and oils claim your dollars and call for your choice.

A baby comes—and again you face a new experience in purchasing clothes and powders and blankets; in buying a crib, baby carriage, foods, toys.

Next—what school? For the years pass incredibly fast. Once more, a new decision.

Every room of your house requires choice. Every meal served in your dining-room results from your having decided on what to serve. Every day confronts you with a multitude of possibilities from which you must select those which make life happier and better, and make the dollars go farther.

How on earth are you going to make those decisions? How can you know what you want and what you don't want? How can you buy to such advantage that you'll seldom, if ever, have occasion to use that futile phrase, "I wish I'd bought something else"?

You get your ideas from reading advertisements do you not?

The non-advertisers should think this matter over too.

Each parcel will be offered for sale subject to the approval of the Minister of Municipal Affairs, and subject to a reserve bid and to the reservations contained in the existing certificates of title.

Terms cash.
Redemption may be effected by payment of all arrears of taxes and costs at any time prior to the sale.

Dated at Gleichen, Alberta, this 25th day of July, 1938.
W. J. FRYEHLAN,
Secretary-Treasurer.

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

Mrs. Pinder and Mrs. Ostrander left a week ago to visit relatives near Saskatoon.

Rev. S. Deacon, ex-M.L.A. of Calgary, preached at the Methodist church last Sunday.

After an absence of eight years in different states Chas Rendell returned to town to visit his sister-in-law Mrs. Ringer.

Miss Wilson of Medicine has spent a few days in town last week visiting Mrs. Jowett and met many of her former friends while here.

W. Rogers of Winnipeg is in town buying cattle.

C. P. R. Agent Sufell returned last week from a trip to Ontario, where he visited relatives and friends. His wife and family will remain in the east for a couple of months.

Mrs. J. A. Beaupre of Calgary is visiting Mr. and Mrs. J. A. Renaud and her many old friends.

Loafers and merely nominal workers of the North American continent have fallen upon evil days. Both in Canada and the United States the law has now set its face against them. Recently in Gleichen a young man paid \$20 for loafing and was given the opportunity to work or move on and he is now on his way.

P. B. Blevins of Ouelletville offers the sum of \$25 to any person anywhere who will leave a bushel of wheat grown this year at The Call office that weighs more than a bushel of that will bring to this office. The offer stands good until the end of December.

The Gleichen baseball team invaded Calgary last Thursday night and entertained the All-Star boys of Calgary picked by President Lloyd Turner in a good game although the All-Stars won by a score of 13-4. The Calgary boys had a big run lead by the 3rd inning. It is thought the large crowd made Gleichen suffer stage fright.

Measrs Bremner Hawthorne and Taylor with their wives and families have joined the camping parties at the Bow River.

Pte. Archie McLeod has returned from the front and is now resting at home.

J. Umbricht is entertaining a lot of Gleichen folk at his bungalow in J. J. is said to be one of the finest at that world-famed resort. No less than eighteen were there one night last week.

Measrs. Art Walker, Ad Wilson and R. B. Hayes, with their wives and families returned last week after spending a short holiday at Banff.

David McEwan's new house eight miles north of town is almost complete and is said to be one of the most modern in these parts.

W. W. Brown is erecting a concrete base and iron fence around his residence on Seventh Avenue and is leaving up his property. When complete his residence will be the finest in appearance in town.

Measrs. Lett and Bob McArthur left Friday night and spent Sunday in Banff.

Pete, Report Hunter and Frank Bates left last Friday for the east with a draft of the Strathcona Horse. Their exact destination was not made known.

Mrs. S. A. Hall left last week on an extended visit to her parents at Birtle, Man.

When a boy fell and suffered a severe knee cut, and his frightened companions were unable to aid him, some nearby Scouts at once came to his assistance. After giving first aid and bandaging the knee, the Scouts improvised a stretcher, rushing the injured boy to a doctor, who felt it necessary to use six stitches to close the wound. During the boy's convalescence he was visited by the Scouts, and is now a member of the troop.

Town & District

R. S. McQueen returned last week from his trip to the coast.

Mrs. V. McMan has returned home after spending several weeks in Calgary.

Robert Staback and his son Jack returned to Calgary last week after spending a week or so visiting relatives and friends here.

The Gleichen schools will open on Thursday September 1st and how the boys and girls hate to hear that news.

Rev. and Mrs. V. M. Gilbert of Stettinore spent several days last week visiting Aunt and Mrs. J. Atherton.

Charles McKay, who for the past two or three weeks has been visiting his cousin Can pleth and Elliot Evans left Saturday for Calgary on route to his home at Cannington, Ont.

The implement men of the town, have been very busy of late setting up combines and binders, all of which have been sold. With these machines leaving every day their yards are beginning to have a vacant look.

Chas. Thompson the local building contractor is busy these days adding an addition to a church in Rockyford. Mr. Thompson states he has several more contracts in sight in that area and expects to be kept busy until winter.

A very heavy rain fell late Saturday night and again, at about the same hour Sunday night effectively stopping any plans of farmers to start harvesting Monday morning. By Tuesday some cutting was under way. During the past week some cutting has been done.

Quite a number of the high school boys have been spending their holidays on farms doing odd jobs and generally making good use of themselves and incidentally earning a few odd dollars which will come in handy when they come back to town and school starts again.

The Toronto Conservatory of Music has advised Miss Marjorie Birch that she has been successful in passing the Harmony and Counterpoint examinations as required for the A.T.C.M. degree. She passed both examinations with first class honors gaining an average of 86 per cent of the total marks.

Recently E. W. Taylor got lost on the reserve. This happened between Gleichen and Nanaka and when Mr. Taylor finally found himself he was at Art Bremner's home. W. W. Brown is greatly perplexed over Ed getting lost in that region with a railroad track and Bow river to the south, a lake and a railroad to the north, a fence in the west and the Gleichen water tower visible in the east. Bownie has over looked the fact that Mr. Taylor is a great fisherman and like all fishermen tell fish stories.

If you have anything you want to buy, sell or trade, try a Call classified ad. They are cheap.

"When a car is passing you, take your foot off the gas. That doubles his speed and gets him past quicker." This suggestion was made in a letter to an editor and it appealed to him to make the following comment, which is well worth passing on. "Many of the worst accidents have come from drivers making it harder for cars to pass them, instead of making it easier. Often the situation develops into a race, with both cars going faster and faster. Then tragedy is imminent at a turn, the approach of a steep hill a head—and possibly cars coming up. It used to be regarded in the early days of motoring, as legitimate sport to try to beat the other car. The notion has largely vanished, since almost every car now will go faster than anybody has any business going and everybody knows it. If the fellow behind is a speed fiend the sooner he passes the better for you.—EX.

CARD OF THANKS

We wish to thank our many friends for their kindness in our recent bereavement.

Mr. and Mrs. P. Downey and family.

ENGAGEMENT ANNOUNCED

Mr. and Mrs. Frank A. Hall of Arrowwood, Alberta, announce the engagement of their only daughter, Ruby Alice, to Mr. George Hollist of Mossleigh, Alberta. Wedding to take place August 24th, 1938 at noon at the home of the bride-elect's parents.
